Blyott Remote Insights Platform & Analytics

Blyott Remote Insights Platform & Analytics

Big savings and happy staff

Keeping track of different equipment is an extremely complex task, and consequently, staff loses valuable time every day searching for the right assets.
Meanwhile, organizations buy 10-20% more equipment than what is needed to avoid understock.

> Teams shouldn't have to spend time manually serarching for assets. They should be allowed more time to focus on what drives them and what they do best.

The reality is that most organizations don't have a clear overview of equipment utilization, theft, loss, and process optimization like staff flows.

Until now, no solution has successfully accommodated the reality of the multifaceted organizational challenges and provided companies and employees with a simple, efficient, and affordable solution for asset management.

The goals of reducing costs, increasing efficiencies, and removing bottlenecks are undoubtedly paramount, but they must be achieved in a way that doesn't contribute additional pressure on teams.

Blyott

① **Blyott Sensors**

Fix on asset. Location, movement and temperature sensors, long battery life.

**②** **Wi-Fi AP's with Bluetooth**(*)

Receive Blyott sensor info. Wi-Fi AP's, fixed & mobile (4G) locators.

③ **Remote Insights Platform**

Serverless & scalable architecture. Big "Location" Data analytics.

④ **Customer Apps**

Blyott Web & Mobile App. Support for 3rd party apps using Rest API's.

Asset tracking frees up time for staff and reduces costs

Indoor localization technologies (RTLS) have been around for over a decade, but not yet widely implemented due to high costs and complexity.

The Blyott Remote Insights Platform is different. It's easy to set up using your existing Wi-Fi infrastructure and comes with a pay-as-you-grow model, so you can achieve big savings and happy staff.

One solution, 4 components

The Blyott Remote Insights Platform provides you with an all-in-one solution to track and monitor thousands of assets. The platform uses a serverless and scalable architecture and allows various vendors to join in.

Blyott Sensors

No AP's with BLE? Use our Locators.

Remote Insights Platform

Use our Tiny Sensors or Sticker Sensors, too.

Customer Apps

(*)The Blyott solution is compatible with Wi-Fi APs enabled with Bluetooth® technology from various vendors. Bluetooth® is a registered trademark of Bluetooth SIG, Inc.

Multiple use cases resulting in big savings and happy staff

✓ Indoor and real-time localization of assets, employee flows, live inventory, theft prevention.

✓ Insights with Big "Location" Data: monitoring asset utilization, predictive maintenance.

✓ Monitoring of temperatures in refrigerators, room occupancy, air quality, emergency buttons.

✓ Internet of Things: e.g. monitoring of environment via IoT sensors.

The real power of asset tracking is Big Location Data

The true power of asset tracking lies in Big Location Data. Blyott's Remote Insights Platform offers real-time location tracking, along with detailed insights into asset usage and operational patterns over time.

Users can access this data via standard or customizable dashboards, or download it for use in tools like Power BI.

Blyott's solution also monitors temperature (e.g. in refrigerators) with integrated alerts and logs, ideal for audit and compliance. This data helps organizations optimize resource allocation, enhance efficiency, and gain deeper insights into asset usage.

Partnership with amazon QuickSight

AWS QuickSight and Blyott's Remote Insights Platform combine to deliver powerful, real-time insights on asset tracking and patient flow, driving smarter decisions and boosting operational efficiency.

Shows the number of times asset data has been consulted per type of asset.

Assets in storage: check if there's a surplus or shortage of pumps.

One solution, 4 crucial advantages of remote asset tracking and monitoring

Teams lose substantial time searching for the right equipment while equipment spendings rise because there is no clear view on utilization, theft, and process optimization, like staff flows.

With real-time asset tracking you're on fast-track to big savings and happy staff. Get started now.

1   Extremely fast to implement

Blyott connects directly to existing Wi-Fi access points with built-in Bluetooth(*) infrastructure, and within minutes you can be live.

2   Do more with your localization data

With the Insights Module, combining machine learning (ML) with Big Location Data, you can get much more insights into asset utilization.

3   Integrate with other apps and services

Using REST APIs and webhooks, Blyott alows devices to communicate regardless of operating system, technology or ecosystem.

4   Attractive pricing model

Enjoy Blyott's "pay-as-you-grow" business model with very few upfront costs. It's time to put data to work at an affordable price.

About Blyott

Blyott is at the forefront of transforming industries with innovative localization and monitoring solutions. Our platform integrates advanced data analytics and AI, supporting various sectors to navigate operational challenges, enhance efficiency, foster staff well-being, and achieve sustainability goals.

EASY TO SET UP
Works in a matter of minutes.

SCALABLE
Scale to millions of assets.

PAY-AS-YOU-GROW
Custom plans are available.

OPEN STANDARD
Integrate using REST APIs and webhooks.
