Easily Track Your Assets and Monitor Your Inventory with Blyott

Big Savings, Happy Staff

Asset tracking and inventory management are up for discussion in many organizations in most sectors. What are the optimal solutions, the most effective, the safest, and the best in price?

In the past, technologies for accurate asset tracking and management of consignment goods have been limited. Solutions were either ineffective or too expensive.

> Blyott offers an affordable and scalable setup that gives you remote insights into your assets so you can save big on money and time.
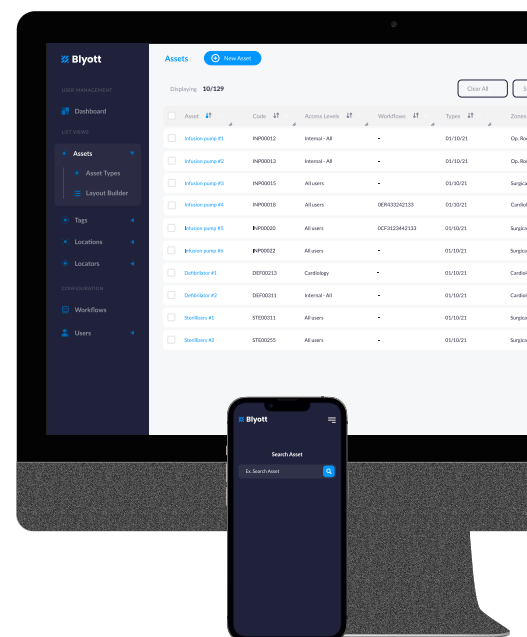

Blyott changes this with a real-time location tracking solution that consists of both hardware and software components. This single solution allows you to track assets and manage and optimize inventory control.

Hands-On Insights with Big Location Data

With the Blyott Insights Module, you can combine machine learning (ML) and Big Location Data to get much greater insights into asset utilization as well as stock consumption.

For instance, calculate utilization based on movement and location or predict stock in various places.

✓ Super fast to implement, be live in days, not months.

✓ Get insights into utilization and stock consumption.

✓ Easily integrate with other apps and services.

✓ Pay-as-you-grow pricing model, limited upfront costs.

Blyott

Blyott

One Solution, 4 Components

1 Blyott Sensors

Fix on asset. Location, movement and temperature sensors, long battery life.

2 Wi-Fi AP's with Bluetooth(*)

Receive Blyott sensor info. Wi-Fi AP's, fixed & mobile (4G) locators.

3 Remote Insights Platform

Serverless & scalable architecture. Big "Location" Data analytics.
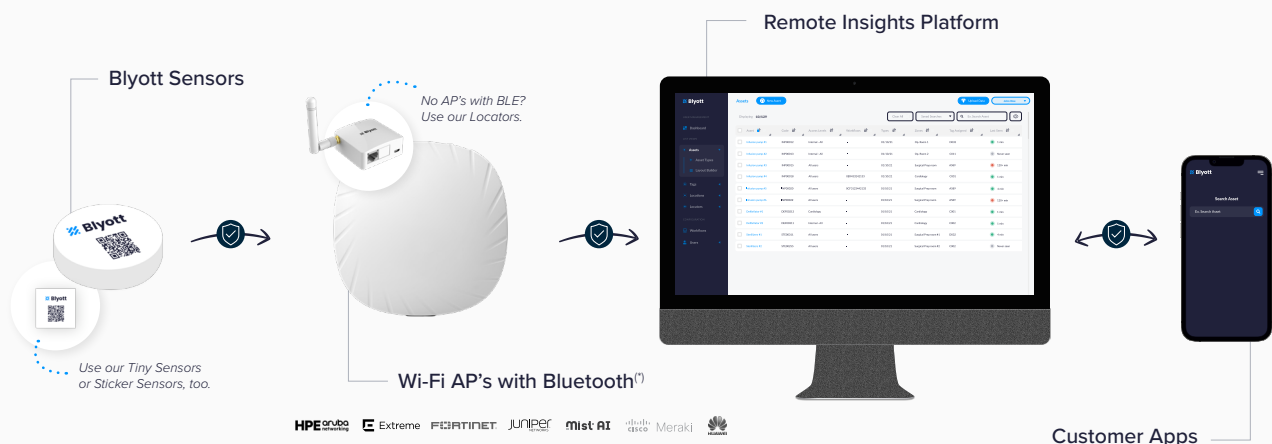

4 Customer Apps

Blyott Web & Mobile App. Support for 3rd party apps using Rest API's.

Indoor localization technologies (RTLS) have been around for over a decade, but not yet widely implemented due to high costs and complexity.

The Blyott Remote Insights Platform is different. It's easy to set up using your existing Wi-Fi infrastructure and comes with a pay-as-you-grow model, so you can achieve big savings and happy staff.

This is an all-in-one solution to serve your remote asset tracking and monitoring needs for thousands of assets. The platform runs in the cloud (no software installation is required) and is built using a scalable architecture that allows various vendors to join in.

Remote Insights Platform
